

2024 Native Plant Sale

Pre-Orders ONLY

Pick-Up: Saturday, May 18th
9:30am - 12:30pm

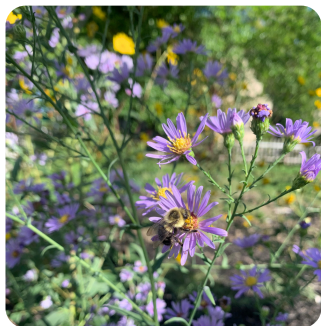

Pick-Up Location: 2412 Taft Road, Allegan

Plentiful Pollinator ~ This is the garden kit that supplies some of the best natives to attract a wide range of different pollinators. Ohio Horsemint & Sand Coreopsis make great groundcovers under 2' tall. Hairy Mountainmint, Purple Hyssop, & Boneset are long bloomers in late summer followed by Joe-Pye weed. Pair Showy Goldenrod with Sky Blue Aster for an autumn blooming explosion. Full sun, dry to medium for all except Boneset, & Joe Pye weed who prefer a more moist location.

Xeriscape means irrigation free, once established. These plants are tough as nails. Hairy Beardtongue & Whorled Milkweed are edging plants for hummingbirds & butterflies. Western Sunflower is a silvery, aggressive groundcover that spreads like a mat. Butterfly Weed, Yellow False Indigo, & Purple Coneflower are long blooming under 3.5' tall. Savanna Blazing Star & Smooth Blue Aster bloom in late summer to early autumn.

Shade Enhancer ~ Ginger has soft, heart-shaped leaves that make a graceful groundcover. Zig-Zag Goldenrod has interesting whorled flowers & spreads as a 2' mat. Hummingbirds will visit Columbine, Yellow Hyssop, Cardinal Flower, & Great Blue Lobelia. False Sunflower is long blooming and pairs well with Blue Wood Aster. Cardinal Flower & Great Blue Lobelia prefer consistently moist soil while the others prefer dry to medium.

SC/T/E ~ Plants of Special Concern, Threatened, & Endangered are what you will find here. It is important to keep using these so they do not become Extirpated (locally extinct in MI). Use Silky Aster-SC, Prairie Coreopsis-E, & Hairy Petunia-T as low groundcovers. Downy Sunflower-T & Prairie Sage have silver foliage & aggressively spread. Rattlesnake Master has unique globe shaped flowers. The Clustered Mountainmint blooms June-August. Bayberry shrubs provide food/cover for birds.
